LANGUAGES

- Hebrew – Native
- English – Fluent

Full-stack web developer with a front-end orientation, emphasizing adaptability and efficiency. I excel at embracing new challenges, delivering high-quality, well-organized code on time, and am committed to driving continuous improvement for myself and the workplace.

PROFESSIONAL EXPERIENCE

2021 - 2024 ● Full stack developer Israel Defense Forces

- Designed and developed multiple front-end and back-end applications utilizing React.js, Next.js, Node.js, SQL, SCSS and Typescript.
- Built and maintained an ecosystem of integrated applications.
- Helped migrate from vanilla js to React/Next.js written in Typescript.
- Had experience with Azure cloud services, including managing app services' settings and tokens, maintaining SQL Servers on virtual machines, and performing basic deployment and pipeline tasks.
- Worked with a team of 7 full stack developers and was in charge of recruits and their initiation.

2024 ● UIUX Designer Israel Defense Forces

- Upgraded and adapted existing designs while considering the users' needs and experience.
- Created user interfaces for various linked systems, balancing between maintaining the consistency of a design line and expressing the uniqueness of each interface.

EDUCATION

2019-2021 ● Herzliya Hebrew Gymnasium

- Computer Science – 10 units, along with an android application project, using skills: Java, Android Studio/SDK, XML.

For a final project, I developed a learning application that generates Java code and teaches beginners the language by practicing output calculations at different levels.

The application excelled and was praised by the head of the computer science major and it was suggested that it be entered into production / the application store.

- Chemistry – 5 units.
